

Welcome to Your First Visit!

What to Expect When You Visit Us

We're so glad you're here! Our team is committed to providing compassionate, thorough care in a calm, friendly environment—for both you *and* your pet.

(This document has been officially supervised by our hospital cat, Squeaky.)

Front Desk: First Hellos

When you arrive, our front desk team will:

- Check you and your pet in
- Confirm your contact and pet information as well medical record history
- Help with any paperwork or questions

Squeaky says: "I greet everyone. Some think I run the place."

Meet the Nurse: Getting the Full Picture

Next, one of our veterinary nurses will bring you to a private exam room to:

- Take your pet's vital signs (weight, temperature, heart rate, etc.)
- Review medical history and lifestyle
- Discuss any concerns you'd like to address

Please let us know if your pet is anxious, nervous, or especially treat-motivated!

We want every visit to be as comfortable and positive as possible, and we tailor our approach to each pet. Fear-free handling, extra time, gentle techniques—and yes, **we are absolutely not above winning them over with bribes (cookies).**

Squeaky says: "Bribes work on me. Just saying."

Meet the Doctor: Personalized Care

Your veterinarian will:

- Perform a thorough nose-to-tail exam
- Review findings with you
- Work with you to create a personalized care plan

We believe in clear communication and partnership—your input helps us provide better care.

What We Recommend Yearly (and Why)

Vaccines

Vaccines protect your pet from serious, contagious, and potentially life-threatening diseases. Staying up to date helps protect your pet, other animals, and people.

Bloodwork and Screenings

Pets age faster than humans, and many illnesses show no early signs. Yearly bloodwork helps us catch changes early—often before your pet seems sick. We will also recommend parasite testing annually.

Year-Round Preventatives

We recommend parasite prevention **all year long**, even in the colder months. Consistent prevention helps protect your pet—and your family—from avoidable illness.

Dental Care

Just like people, pets need regular dental cleanings. Dental disease can cause pain, infection, and tooth loss and can affect the heart, liver, and kidneys. Routine dental care supports whole-body health—just like your own dental visits do.

Squeaky says: “Tiny bugs are rude. Prevention is smart.”

Payment Options

We want veterinary care to be as accessible and stress-free as possible. We offer several payment options, including:

- **Cash or Credit Card**
- **CareCredit:** <https://www.carecredit.com>
- **Cherry Payment Plans:** <https://pay.withcherry.com/hoboken-vets-animal-clinic>

Our front desk team is happy to help answer questions.

Wellness visits are about building a foundation for a long, happy, healthy life.

Our Vision

A clinic where learning is constant, compassion is real, and integrity leads the way — making veterinary care clearer, kinder, and easier for every pet parent.
